

Earthenware Mark E6b

A common impressed mark with DAVENPORT in a semi-circle over an anchor. The two numbers giving the year of manufacture, here 1856. It was used on most earthenwares, often as well as pattern name marks etc.

<u>Mark</u>	<u>Date</u>	<u>Frequency</u>
Impressed	1836-c1862	very common

It is possible that date numbers were introduced by William Davenport in 1836 and concrete evidence of earlier dates to disprove this would be welcomed by the author - please send details.
